## THEMATIC SCOPE

The 14<sup>th</sup> Symposium of Magnetic Measurements & Modelling provides an excellent opportunity for scientists and engineers dealing with magnetic measurements and modelling of magnetic properties to present and to discuss the results of their research. From 2014 to 2018 the Symposium was organized under the auspices of Polish Academy of Science, Committee of Electrical Engineering.

English will be the official language of the Symposium.

Thematic scope of the Symposium includes theoretical and practical issues related to:

- measurements of magnetic quantities,
- indirect measurements of physical quantities using magnetic measurements,
- measurement techniques in high frequency range,
- nondestructive evaluation of materials,
- modelling of magnetic properties,
- magnetocaloric and magnetomechanical effect,
- structure and properties of magnetic materials,
- sensors and actuators,
- magnetic circuits in electrical machines,
- mechatronics systems.

## POST-CONFERENCE PUBLICATIONS

All submitted papers will be evaluated by reviewers. Selected papers presented at the Symposium will be published in scientific journals: Acta Physica Polonica A, Archives of Electrical Engineering and Przegląd Elektrotechniczny.
